

Components Overview

Rick Stine,
President, Military & Components,
has more than 25 years of aerospace industry leadership experience.

Prior to joining StandardAero in 2011, Rick was Senior Vice President of Technical Operations for HEICO, a leading provider of aircraft replacement parts. He also spent more than 12 years with GE Aircraft Engines.

StandardAero is the world's largest independent supplier of aviation maintenance, repair and overhaul (MRO) services.

StandardAero provides component repair and overhaul services that help customers reduce aircraft downtime, cut operating costs and improve engine performance.

Our Commitment

Quality, on-time performance and best-in-class customer support makes StandardAero Components the natural choice for customers who have come to rely on StandardAero over a century of service to the aviation industry. We have developed productive partnerships with leading aerospace companies and have been named a preferred supplier on General Electric, Honeywell, Snecma, Pratt & Whitney, Pratt & Whitney Canada, and Rolls-Royce aircraft engines.

StandardAero Components was formed in 2011 to meet our customers' needs for high-quality, reliable, cost-effective component maintenance and repair services. Customer support has been a key driver of the Components business, which has nearly doubled in size since StandardAero acquired TSS Aviation in 2007.

We rate among aviation industry leaders with on-time-delivery rates above 95% and a commitment to continually improving our performance through the use of Six Sigma and Lean Manufacturing tools and techniques.

Capabilities

From our state-of-the-art facilities in Cincinnati and Winnipeg, StandardAero Components provides air transport, business aviation, industrial gas turbine, and government and military customers with a wide range of maintenance and repair capabilities, including:

- Special Repair Processes
- Composite Capabilities
- Part Capabilities
- Electron Beam Weld and Honeycomb Capabilities
- Laser Welding, Cladding and Cutting
- Platinum Aluminide Coatings
- Waterjet Stripping
